

BBC Bitesize Schools Tour Careers in Innovation

We were honoured to host the BBC Bitesize school tour. Nick Bright – DJ on radio one extra, Angela Stevenson – Head Engineer BBC Radio Stations, Dominic Coy – Jacobs, Emily Ling - Hirestreet were all part of the panel discussing careers in innovation. The aim of the Bitesize Schools Tour is to raise awareness of the opportunities available in these sectors to secondary pupils and give them practical advice on how they could pursue a career in this area.

Destination Success

We hosted the drama-based careers workshop with Destination Success. The performance encourages students to aim higher and focus on post 16 options and career pathways. The session was delivered by actors in a fun and fitting setting designed to inspire young people.

Y11 Careers Guidance Session's are ongoing.

Home pack contains, what happens after Y11, Training providers, North East Labour Market Information, SWOT Analysis, Guide to Apprenticeships,

Look out for your son or daughters action plan and information about post 16 options.

Life Skills by Barclays

Traineeships, A Guide for parents, Getting ready for the world of work Higher Education a guide for parents.

Session one was all about recognising and building personal skills - This lesson is designed to help students understand which skills most are sought after by employers and how they may need to adapt these in different situations. This lesson supports students in recognising the importance of aiming high and how to identify opportunities to be proactive and reach their future goals.

Careers Assemblies

The careers assemblies aim to inform students about what to expect from their careers programme this term and to give update information of the local labour market in the North East.

STEM Assemblies

Delivered by NUSTEM from Northumbria University
In 2021 the STEM assembly will focus on the benefits of a circular economy where we reduce waste, keep products in use and regenerate natural systems.
The STEM assemblies are a great way to get your students to think about where a career in STEM can lead to, as we showcase case studies, routes into careers and local employers for a particular STEM sector.
